

edsembliFIN

A powerful finance solution designed for school administrations

Stay in control of your financial processes with an all-in-one financial management solution that addresses the needs of modern education. Maximize visibility, empower reporting, and make informed decisions with a solution that ensures data accuracy across essential systems.

A financial management system built to address modern education's unique needs

Every year, modern education is being asked to do more with less. Individual schools and districts rely on their finance departments to ensure they stay on budget, maintain compliance for financial transactions, and identify potential cost savings.

We understand the financial processes you rely on and why you rely on them. Our platform was inspired by school districts to overcome sector-specific roadblocks in financial management. Transform the way you allocate, track, and transfer funds with a powerful finance solution.

Edsembli | FIN gives schools and districts all the functionality they need to streamline critical financial processes, including requisitions, purchase orders, inventory management, expense reports, Ministry reporting, and more through an all-in-one platform that leverages cloud technology, automation, and an intuitive interface.

Revamp your budgeting process. Our financial management solution was designed to ensure seamless communication between schools and districts and keep you fully and effortlessly compliant with changing regulatory requirements.

FIN Highlights

100% Cloud Solution

Integrated with HRP and SIS

Enhanced Reporting (Micro/Macro)

Access High-Quality Support

Collaborate With the Edsembli Community

We've built a tool that empowers modern education's finance departments

Ensure seamless communication between essential systems and schools

Eliminate the need for multiple third-party integrations with an all-in-one financial management platform that enhances data connectivity across key departments, maximizing visibility and improving operational efficiency across multiple locations.

Streamline your requisition to cheque process management

Simplify vendor management and purchase orders with built-in requisition to cheque process management. Effortlessly create purchase orders, receive approval, and issue payments with Edsembli | FIN.

Take advantage of built-in reporting functionality

Generate advanced reports while maintaining high-level data security across individual schools and districts. Rely on a dynamic cloud-based model that keeps you fully and effortlessly compliant with changing regulatory requirements.

Maintain better control with role-based access controls

Maximize visibility through every step of critical financial processes. Eliminate auditing issues ahead of time with a visible audit trail, granular role-based access control, and real-time notifications for authorizations.

Rely on a trusted community of schools and districts

Focus on delivering an enhanced learning experience by engaging with a community of education experts. We rely on schools, districts, and industry thought leaders to keep our platform up-to-date with the ever-evolving needs of modern education.

Unlock operational efficiency with automation

Save time, cut costs, and reduce administrative burden by eliminating manual processes wherever possible. Automate approval workflows, complex reporting, and more with a powerful tool that learns on the go.
