

edsembliSIS

Modernize every aspect of student information management

Transform the way you collect, manage, and access student data with a centralized platform that empowers reporting, keeps your data streams aligned, and offers an exceptional user experience for school staff, students, and parents.

Inspired by school districts, built for modern education

Technology has transformed the way schools approach student information management. With more information available than ever, modern education needs intuitive solutions to their student information management problem.

Keeping schools and districts informed and efficient calls for a multi-functional student information system that empowers administrators, teachers, students, and parents. A robust information management system unifies data connectivity across departments while making data easily accessible when you need it most.

Edsembli | SIS leverages cloud technology and automation to keep staff members informed and productive at all times, guarantee compliance with changing rules and regulations, and streamline parent-teacher interactions with built-in form completion, media sharing, and fee payments.

Our student information system was designed for schools and districts looking to improve process efficiency through centralization, automation, and enhanced data connectivity and visibility.

SIS Highlights

100% Cloud Solution

Integrates with HRP and FIN

Fully Customizable Student Profiles

Access High-Quality Support

Collaborate With the Edsembli Community

Empower staff, students, and administrators with an all-in-one student management platform

Streamline student lifecycle management from pre-registration to graduation

From initial pre-registration to graduation, **Edsembli | SIS** leverages data connectivity, automation, and a user-friendly interface to give you complete control over student registration, profile creation, and more.

Transform the way you collect and manage critical student data

Create, auto-populate, and verify student records that include timetables, health records, academic performance, cohorts, and more. Connect directly to students and parents with built-in form completion, fee payments, and communications.

Take advantage of real-time reporting functionality

Effortlessly remain compliant with provincial regulations such as PASI and ON-SIS. Our platform was built with compliance at its core, ensuring full and uninterrupted funding.

Customize every aspect of your student information system

Fine-tune every aspect of the Edsembli dashboard based on your preferences. Our platform offers total flexibility, from design themes, colors, to data layout.

Engage with a community of education thought leaders

Edsembli is focused on continuously improving modern education. We lean on our community of education experts and industry thought leaders to innovate, identify new features, and keep our platform aligned with education's ever-evolving needs.

Leverage automation to become more productive

Improve operational efficiency by embracing automation. Automate approval workflows, student pre-registration, reporting, and more with a powerful tool that learns on the go.
