edsembli

Edsembli | Ecosystem

# All-in-one empowered education management software

Edsembli has been a trusted partner in education domestically and globally for over 35 years and offers a suite of K12 solutions to help school districts manage core business activities. The Ecosystem platform consists of a Student Management system, a Finance Management system and a Human Resource and Payroll system.

Out of the Box Integration

Each component interoperates to enable horizontal communication across all the varied departments, providing deep analytics and insights into organizational health and student success.

Optimal Operational Efficiency

- Reduce the cost of ownership through modern cloud technology
- Increase visibility across the school district with real-time reporting
- Stay secure with OAuth single sign-on with Azure and Google
- Save time and resources with plug and play integration
- Embrace "enter data once" thinking and reduce manual errors

Meet the Edsembli | Ecosystem

Student Information System

Create, store and analyze jurisdictionally-compliant student records. Edsembli SIS fully integrates with every component of the Edsembli Ecosystem.

Learn more >

Finance

Gain complete control over your budget with best practice accounting and purchasing processes.

Learn more >

Human Resources and Payroll

Automate your HR onboarding and offboarding processes with reliable payroll software that supports multiple collective agreements.

Why Choose Edsembli | Ecosystem

Edsembli is the nucleus of all systems. The Edsembli Ecosystem makes it possible to connect parents, students, teachers and administrators to one data source. We use open standards and protocols such as OAuth 2.0, One Roster and soon Ed-Fi, allowing school districts to connect all their favourite tools seamlessly.

Edsembli | Ecosystem allows you to:

- Solve integration and efficiency issues
- Improve communication and engagement
- Improve data accuracy and reduce human errors
- Embrace automation and eliminate paper
- Open standards to embrace future technology
- Improve security with a modern technology stack

Customize Your Edsembli Experience

School districts currently using legacy, on-premise software will realize the greatest cost-saving and operational efficiencies that the Edsembli cloud Ecosystem has to offer. While school districts can achieve maximum benefits by implementing the entire Ecosystem, many districts are likely to implement the ERP or SIS components initially.

Edsembli has proudly supported schools and districts both domestically and globally for over 35 years.

Unpacking the Ecosystem

Date Elements	Edsembli	HRP	Edsembli	SIS	Edsembli	FIN
Employee Demographic Data	✓	✓	✓
Student Demographic Data		✓	✓
Student Fees		✓	✓
