

Edsembli | SIS

A K-12 Student Information System Built for Education

edsembli

Edsembli | SIS is trusted by school districts to report on over 1.4M students annually. Our solution allows school districts to manage student records, achievement, attendance and jurisdictional reporting and offers off-the-shelf integration with Edsembli's cloud solutions for human resources and finance for maximum operational efficiency.

Simplify Access to All Student Data

School districts serve many stakeholders including students, parents, teachers and school administrators. One of the most significant challenges is effectively communicating and sharing information with all relevant parties. Edsembli helps by using group permissions to surface the most critical information first. This means parents can seamlessly navigate the entire parent portal with one login for all of their children, even if they are at different schools within the district. Staff and administrators can manage attendance, achievement reporting, assignments, and other essential data points as defined in permissions.

Key Outcomes

- Stay compliant with jurisdictional compliant student records
- Secure funding with accurate enrolment and attendance reporting
- Make report cards easy with flexible achievement profiles
- Improve communication and privacy with the secure delivery of digital communications
- Increase engagement with accessible, mobile-first technology
- Ensure student safety with call home reports
- Keep parents informed with an integrated mark book with comments, activities, homework and curriculum tracking
- Save time and collect student and parent information digitally with online forms and registration tools
- Embrace "enter data once" thinking with out-of-the-box integration with Edsembli human resources and finance solutions

Edsembli | SIS

Top Features

Student Record Management

Create jurisdictionally-compliant student records directly from one screen.

Online Registration and Forms

Semi-automate digital data collection with built-in forms for registration, events and more.

Attendance and Achievement

Gain better insights into student attendance and achievement with built-in analytics to alert you of issues before they become problems.

Powerful Portals

The Edsembli portal allows teachers, students and parents to interact with marks and comments, attendance, report cards, schedules, courses, fees, homework and special education.

Secure Delivery for Communications

Enhanced security measures ensure the secure delivery and storage of all digital communications, including report cards, incident letters and attendance notes.

Why Choose Edsembli | SIS?

Edsembli | SIS is accessible to all stakeholders, which means everyone relies on the same data source to make informed decisions in the best interest of students. Teachers, parents and students are more engaged with improved access to data, and robust security and permission groups keep confidential data safe. Reducing paper-based and manual processes like registration will improve productivity and reduce human errors that impact funding. Our integration layer is built on a foundation of open standards and protocols, including REST API, IMS Global and OAuth 2.0, which means that you can connect all your existing third-party applications offering you flexibility and choice.

- Stay informed through a district and school-level actionable dashboard
- Enable single sign-on with open standards like OAuth 2.0
- Eliminate duplicate data entry with industry standards like One Roster
- Make informed decisions with options for deep analytics and insights
- Improve accessibility with a mobile-first, responsive design

Accurate Attendance and Flexible Achievement Reporting

Edsembli's attendance tools are flexible and allow teachers to take attendance quickly and accurately. A real-time attendance call home dashboard at the office helps keep students safe.

Pre configurable achievement profiles align with standardized rubrics and simplify student progress reporting to parents and students.
