Why choose Edsembli

Simplify back-office processes

Seamlessly integrate with Learning Management Systems

Identify at-risk students quickly

Shorten the learning curve with intuitive interfaces & videos

Edsembli | SIS enables school districts to manage student records, scheduling, achievement, attendance, jurisdictional reporting, and more.

School districts serve many stakeholders including students, parents, teachers and school administrators. Communicating and sharing information remains a significant challenge today.

Edsembli helps by using group permissions to surface the most critical information first, allowing parents to seamlessly navigate the entire family portal with one login for all of their children, even if they are at different schools within the district. Meanwhile, staff and administrators can manage attendance, achievement reporting, assignments, and other essential data points as defined in permissions.
